

Sher·Stain™

Colored Densifier

The Concrete Décor Hardscape with Inspiration.

Want top-quality staining results? Before you get started, get inspired, with the only concrete décor hardscape product to combine outstanding performance with one-of-a-kind decorative beauty. Sher-Stain™ Colored Densifier is a ready-to-use, water-based, chemical hardener with superior coloring options and tintability. Formulated as a high-end, colorfast finish, Sher-Stain™ adds reflectivity and enhances wear and durability. This penetrating, colored concrete stain and impregnating densifier provides an “all-in-one” (coloration and hardener) solution. It’s a simple way to not only add color and style to concrete surfaces, but also to help protect your valuable investment by keeping it looking better, longer.

Packaged in 5-gallon containers, with an average coverage rate of 400 square feet per gallon. Material can be tinted on a per job basis.

Product Description

This multi-use product both hardens and densifies. It requires fewer polishing steps than traditional stains in order to produce similar results. Sher-Stain™ outperforms typical stains and dyes and functions like an impregnator, deeply penetrating capillaries and forming micro-bonds with the cement to make it less porous and more dense.

Sher-Stain™ will not flake, peel or chip. It leaves no unsightly residual film or stubborn buildup, saving you time and money while providing a beautiful, show-stopping floor. Easy-to-clean and maintain, Sher-Stain™ remains breathable, will not block moisture vapor and wears only as the substrate wears. Finished surfaces can vary in appearance from matte or semi-gloss to a highly-polished, mirror-like finish.

Perhaps most importantly, Sher-Stain™ provides a full spectrum of colors, with 10 standard colors and limitless colorized options available through the Sherwin-Williams Blend-a-Color (BCA) coloring system. Combine these options with superior optimal shine, greater depth, clear vibrancy and a more protected sealed surface to create the ultimate décor solution for your floor.

Sher·Stain™

- Available in clear or white base
- Unlimited tinting options
- Environmentally-friendly
- VOC compliant
- Durable enough for industrial and commercial applications
- Easy enough for do-it-yourselfers
- Interior or exterior use
- Now available throughout the United States, Canada and Mexico.

Technical Description

Sher-Stain™ is a proprietary formula providing superior reaction, uniformity, and unmatched durability while resisting fading and efflorescence. Our unique chemistry combines stellar results with easy application, increased dwell time and deep penetrating protection.

Sher-Stain™ forms chemical bonds to create a micro-film along the surface of the concrete, thus enhancing gloss and hardness without affecting slip resistance. Sher-Stain™ will not absorb water or contribute to SSS (Surface Sweating Syndrome) or ASR (Alkaline Silica Reactivity).

**The result?
Superior polished, densified
surfaces with unrivalled
aesthetic beauty.**

- Helps prevent discoloration or damage from common spills such as food, oil and chemicals as well as environmental containments and everyday use
- Cures quickly to allow for a second coat application, typically in fifteen minutes; floors can be re-opened to traffic one hour after application
- Reduces application time and costs of burnishing and mechanical diamond polishing
- Helps restrict the absorption of water, fatty oils and dirt, making it easier to clean and adding to the lifespan of the floor
- Helps block white crusty salt deposits (efflorescence)

Don't Just Get a Stain. Get Inspired.

Markets Served

- Commercial
- Residential

Features

- Easy to use
- Provides great uniformity and color
- Can apply to fresh concrete
- Wide range of colors
- Looks new longer
- Self-polishing, quick-drying
- Non-dusting, no-marking
- Highly stain-resistant
- Increases surface flatness, durability, wear-resistance and abrasion resistance
- UV resistance
- VOC compliant
- Breathable to allow vapor permeations

Advantages

- Tough durable, cost effective and sustainable
- Increased light reflectivity, reduced permeability
- Increased abrasion and hardness
- Resistant to soils re-depositing on floor
- Locked-in, preserved the color

Benefits

- Turns jobs faster
- Produces immediate results, high sheen and stain protection
- Easier to clean than unsealed/polished
- Provides low-cost maintenance and long-term light reflectivity
- Refurbishable
- Offers low life cycle costs
- Requires less time for application
